

Meritor Part

Meritor Part - The Meritor Business is a premier international dealer founded upon one hundred years of custom of quality and service. Meritor focuses on integrated systems with a range of modules and parts to the original machine manufacturers and aftermarket equipment in the industrial and transportation trades.

Meritor values the needs of their customers to ensure their success while priding itself in the company's unique energy and thinks this output of energy to be their competitive advantage in their worldwide operations. Meritor begins with a philosophy that values diversity of individuals and their broad thought processes. Operating in 19 countries and employing over 11,200 people, Meritor encourages innovation and collaboration among a team of knowledgeable professionals.

Meritor strongly believes in just employing future focused workers. These top-caliber people could quickly adapt to changing surroundings and freely demonstrate the level of commitment and performance considered necessary so as to attain results for the competitive market environment. The company empowers their teams to make sound business decisions in order to enhance the overall success of the business. In return, Meritor provides all their employees different chances for personal and professional development.

The Advanced Engineering team is on the forefront of systems engineering and components. This comprises axles, drivelines, suspension and braking systems used for medium and heavy duty trucks, trailers, off-highway vehicles, buses and military vehicles. The Meritor Advanced Engineering team is developing. They launched a new technical center in Bangalore, India in September 2009 to be able to lead their advanced product development initiatives that represent the whole Asia Pacific region. This particular team is even responsible for supporting the requirements of all their global engineering staff.

Meritor's dynamic and customer focused Quality team is committed to ensuring optimum processing at their production plants and aftermarket distribution facilities that are located all over the world in 19 countries and in 5 different continents.

They have their supplier network that is specifically located to support the development of the business. Every regional team has internationally supported quality systems, initiatives and centralized in Materials Engineering and Six Sigma. Meritor's growing Six Sigma program promotes a fact-based, data-driven method to decision making in each and every part of the company. The DFSS or otherwise known as Design for Six Sigma ensures product reliability in each and every region. The team is also comprised of transactional Green Belts who use Six Sigma tools to business techniques and implement lean methods.
