

Pulp Clamp

Pulp Clamps - There is a wide range of lift truck accessories obtainable so as to make the equipment a lot more efficient. A snowplow attachment could be mounted to the front part of the lift truck. A scoop bucket could be useful if the task requires transferring sand, gravel, soil or snow. A double block handler allows the person operating the forklift to pick up a couple of loads and afterward stack them beside each other. Several of those attachments are really excellent for light to medium tasks.

Another forklift accessory is the package lift clamp, which can carry and move heavier pallets. Furthermore, pallet crane forks could be utilized in order to lift and move pallets with an overhead crane. A drum clamp accessory is useful for transporting heavy drums from place to place without having to use a pallet. Forklift mounted hoppers allow material to be transferred and dumped with out having to do it manually. These hoppers when the bumper is released are self dumping.

There are also accessories obtainable that could transform the lift truck into a commercial broom or mop. Such attachments are perfect for cleaning boat docks, warehouse flooring and parking areas. Forklift mounted platforms are available outfitted with twin entry doors and can be attached so as to move employees from one locale to another. The mounted platform accessory is great for reaching parts which could be difficult to access, especially if you have goods or things stored in out of the way places or really up high.

Attachments could be a very valuable piece of equipment when installed onto a lift truck, transforming an typical forklift into a mobile hoist unit. It is most useful when transferring unstable or difficult loads. This accessory could either be telescopic, mounted on the carriage itself, or be connected or even forklift mounted.
